WHO WE ARE?

We are an Internet of Things (IoT) and Artificial Intelligence (AI) specialized company. Our expert team apply these technologies to provides IT & digital transformation solution. We provide high-value operational outcomes to eliminate downtime, reduce maintenance costs and maximize productivity for small and large enterprises working in healthcare, industries, production lines and logistics.

WHAT WE DO?

THE AUTOMATION ERA IS HERE

Industrial Automation

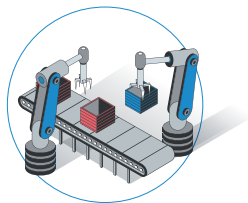

INDUSTRIAL AUTOMATION

We use technologies and systems to make tailored solutions to automate manufacturing processes in order to boost production while decreasing expenses. The level of automation can range from single-operation to end-to-end automation with no human intervention. Industrial automation can be used at any step in the manufacturing process, from materials management to production and assembly to packing and shipment.

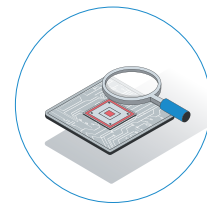

Our Industrial Services:

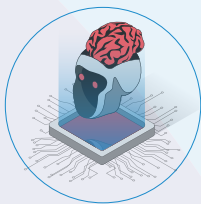

Machine Vision
Systems

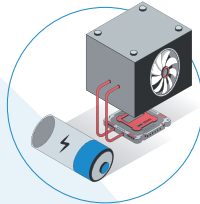

Automatic
Product Sorting

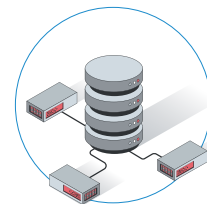

Predictive
Maintenance

Robotic process
automation (RPA)

Energy consumption optimization
and overall Equipment Effectiveness (OEE)

Industrial
Communication

Quality
assurance

Industrial
Sensors

Pain point assessment
and benchmarking

THE AUTOMATION ERA IS HERE

IoT Based Monitoring Systems

Autonera Industrial Monitoring solutions
for the Industrial Sector

Autonera Industrial Monitoring solutions
for the Industrial Sector

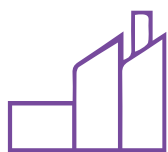

IOT BASED MONITORING SYSTEMS

You Can't Manage
What You Don't
Measure.

Our monitoring systems are built to discover, connect, monitor and manage all your various devices and operations using accurate sensors, enabling you to gain full observability into all activities across your establishment, aggregate and analyze data using machine learning to inform of possible future problems and ensure equipment operation are within predefined parameters.

AUTONERA INDUSTRIAL MONITORING SOLUTIONS

FOR THE SECTOR:

-  Air quality monitoring
-  Liquefied biogas (LBG) monitoring
-  Tanks level monitoring
-  Temperature and humidity monitoring
-  Water quality monitoring
-  Pressure monitoring
-  Chemical materials monitoring
-  Gases monitoring
-  Flow monitoring

AUTONERA INDUSTRIAL MONITORING SOLUTIONS

○ FOR THE MEDICAL SECTOR:

-  Temperature and humidity monitoring of blood banks, freezers and medical refrigerators.
-  Medical gasses pressure monitoring
-  Air quality measurement, pollution indicators detection
-  Negative room pressure monitoring
-  Medical device integration with hospital BMS
